## — File format required —

		Minimum Definition	Minimum Dimension
<b>PHOTOSHOP</b>	TIFF (PSD)	150 dpi 300 dpi	SCALE 1:1 SCALE 1:2
<b>ILLUSTRATOR</b>	AI, EPS, PDF		

- \* Your graphism width **must be 10 cm larger** than the carpet.  
For example to print a 2 m wide carpet, the design must be 2.10 m.
  - \* Think to add a length of 50 cm of safety margin at the beginning of the print file.
  - \* Minimum thickness for the letters: 2 mm.
- Transfer your heavy files with [www.wetransfer.com](http://www.wetransfer.com) or Onedrive.

## IMPORTANT

All our printed carpets are delivered without protective film.  
We cannot guarantee 100% the exact joint between 2 printed carpet rolls laid side by side.  
Indeed, printing generates a slight stretching of the carpet resulting in a slight deformation of the pattern of up to  $\pm 3$ cm every meter.  
Nonetheless, even with this variation, the result will be outstanding.
